WHO AM I?

I can write effective programs in C++ and find non-standard solutions to tasks. While studying in "Applied mathematics and computer science", I received a good mathematical education, which will help me in developing products for your company. I constantly use my knowledge of standard algorithms and data structures when writing software code, honing my experience in contests on Olympiad programming. I am fond of machine learning in Python 3 and everything related to it. I periodically improve my skills by building classical models and neural networks for solving analytical problems. Trying to find myself in site development has rewarded me with an understanding of the main business processes and the importance of getting the job done on time. I am sure that my focus on results and desire to develop will be able to benefit your team and will become the Foundation for our long-term cooperation.

EXPERIENCE

2020	Web Development I tried myself at web development and made https://hmelnoykorol.ru website. Django / Python / HTML/CSS	Alone
------	---	-------

EDUCATION

2017 – 2021	Bachelor's Degree Applied Mathematics and Computer Science	Moscow Aviation Institute
2019	Course Machine Learning in MAI	Mail.ru Group

LANGUAGES

Russian - native
English - B2 level

HOBBIES

In addition to studying, I am interested in basketball, history, and law. I like to walk around the evening city and constantly learn something new.

READY TO WORK

I am ready to work now about 35 hours a week, depending on the distance to work.
